the stock which is about to get over.

7. BEHAVIOUR

AS

The problem faced by the retailers is that they do not have any system to record and keep their inventory data. It is difficult for the owner to record the inventory data quickly and safely because they only keep it in the logbook and not properly organized.

Our Proposed Model targets retailers to have a

Most of the retailers buy stocks which cannot be kept in account or tracked since the stock count is more in number.

Feels so hard to manage the inventory information. By this inventory management system one can manage the whole inventory information and it is time saving.

10. YOUR SOLUTION

We aim to design an Inventory Management system which is used to manage the inventory details and aims to save for the future investments. User can track the stocks sold and yet to be sold and can

visualize it. The Application will notify the user when a stock is about to complete. Our web application will monitor user's stock by tracking the received SMS's from the user's mobile.

8.2 OFFLINE

Check regularly and intimate the retailer.
